

Takoradi Educational Resource Centre - To Be Worldwide Ghana

It is with great pleasure that we introduce you to **Priscilla**. Priscilla has been one of our very motivated students. She is an example of a student who has followed the basic computer skills course at our Centre, and graduated. It is in particular her ability to put what she has learnt to use in the community (which she mentioned in her message) and her eagerness to continue to learn and help other children at the Centre makes her special.

Net4kids Aid Foundation supports the ICT program and part of the library program at the Takoradi Educational Resource Centre

Priscilla Gloria Nashlord Bekoe

My My family comes from the Volta Region. We are four children to my parents a sister, two brothers and me. The name of my sister is Henrieter Nashlord Bekoe. She is a student at Fijai Senior Secondary School. The names of my two brothers are Emmanule Nashlord Bekoe and Eliijia Nashlord Bekoe .

MY SELF AND THE BENEFICT I GOT FROM INFORMATION AND COMMUNICATION TECHNOLOGY{ICT}

Priscilla Gloria Nashlord Bekoe is my name. I am 13 years old. I am a student. I attend school at Christ the King Methodist Preparatory. I also attend church at Holy Fire International. What I have leant from Information and Communication Technology {ICT } are many. I have experience the good side of it and for the first time, I just leant how to mention the names and other parts. But now I have some knowledge on the following programs:

1. Windows environment (Paint; WordPad; Calculator; Setting date& time for the computer; Handling of files and folders by copying, cutting and pasting them in other folders).
2. Office programs (MS Word, Excel and PowerPoint).
3. Internet information. (Creating my own E-mail address to have easy and fast way of communicating with friends, getting new information from World Wide, and making more enquiries).

Power Point program has helped me to assist those who do presentation by advertising their products on Television to make easy way of delivery. “Pricilla has been able to assist traders in her community to prepare an advertisement on Powerpoint to be aired on the local TV station”

I was finding it difficult to E- mail my friends. But with the help of To Be Worldwide ICT Training Center, it is now easy for me to work with the computer. This has overcome the usage of plenty papers by posting short information through the Post office and inconveniency of the letter getting to its destination at the preferred time. ICT has also

helped me to learn more and compete with friends through the Quiz being organized and published on the Internet. In fact ICT has facilitated the movement of so many things in my environment and I will continue to learn and convince my fellow friend to take ICT to be one of the good assets which is helping the nation wide.
