

Opening of the new ICT lab great success with full community involvement

More than 100 parents, children and community leaders came on Saturday the 25th of November to see the new ICT lab and officially open it. Amongst the guests were Mr. Bruce of the Metro Education Board and a representative of the Traditional Council of Komenda where the next To Be Worldwide Centre will be located. Local teachers and head mistresses stressed the importance, in a direct appeal to all guests present, for parents to motivate their children to visit the centre for ICT classes and library use. Parents were asked to help To Be Worldwide reach as many children as possible by informing other parents. Francis Ackon, Head IT Tutor at the Centre, will visit different locations in the community with a presentation about the Centre to help parents understand the importance of the work done there.

New computer lab is ready to be viewed by parents and children.

Lea working on a presentation for the opening

Father Wellbourne, Member of To Be Worldwide Ghana Board, welcoming parents, teachers and children to the opening of the new computer lab

Mr. Francis Ackon, Head IT Tutor at TERC, introducing a leading student in last year's computer class

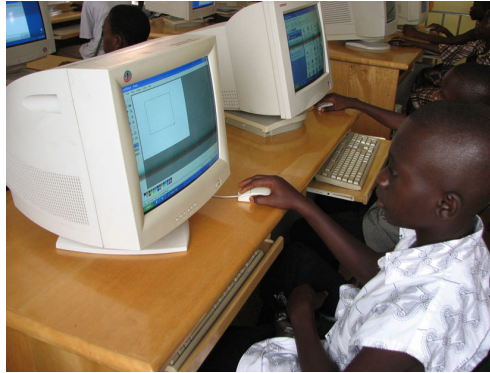

Mrs. Georgina Williams, Director of the TERCTO showing the new computer lab to parents and teachers. With 40 extra computers, the To Be centre can now handle larger classes

None of the children had been up to the new computer classroom since we started building. It was truly a big surprise for them see the new classroom.

Festive entrance to lab

Kids could not wait to try out the new computers

Clearly happy with the new room

The opening was a great event, refreshments were served and a small book and toy raffle was held for the children.

A special thank you to all our sponsor who made the new computer classroom possible!!!

We would like to take this opportunity to thank all who granted us the opportunity to meet them. We also thank them for their willingness to give us input on our plans as well as pointing us in the right direction, bringing us closer to reaching our objectives.

Thank you
